DETAILED ACTION

1. This Office Action is the answer to the Amendment filed on August 7, 2008, which paper has been placed of record in the file.
2. Claims 1-14 are pending in this application.

Response to Arguments/Amendment

3. Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of new grounds of rejection.
4. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3-5 and 9-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayosh, U.S. Patent No. 6,611,598.

Regarding to claims 3-5 and 9-14, Hayosh discloses a check verification system comprising:

a receiver, wherein the receiver is adapted to receive checks based on information provided thereto, the information including a MICR line that includes an ABA number of a bank and a customer account number... (*column 2, lines 18-65, laser printer*);

a check printer, wherein the check printer is adapted to print the information on the MICR line provided to the check verifier by an entity desiring authentication of a check presented for payment, along with the key provided to the check verifier... (*column 14, lines 5-10, verification reader*).

a check verifier adapted to verify checks...

a receiver configured to receive information...

a check printer configured to access...

Examiner submits that the claimed invention recites an intended use, although Hayosh fails to discuss the intended use which is *to receive and print the hash value containing in the MICR line of a check*, Hayosh's computer system is capable of printing and verifying the hash value containing in the MICR line of a check. Therefore, it would have been obvious to one with ordinary skill in the art at the time the invention was made to modify Hayosh's to include the feature above for the purpose of enhancing the security in processing a check.

"The recitation of a new intended use for an old product does not make a claim to that old product patentable." *In re Schreiber*, 44 USPQ2d 1429 (Fed. Cir. 1997).

Examiner Note: To avoid the intended use in the claim language, the claims should be amended to delete the phrases "adapted to" and "configured to", for example: a receiver receiving checks..., a check printer printing the information, a check verifier verifying checks, etc...

Allowable Subject Matter

7. Claims 1, 2 and 6-8 are allowed over the prior art of cited records.

Conclusion

8. Claims **1, 2 and 6-8** are allowed.
Claims **3-5 and 9-14** are rejected.
